V20 LED Lighting Tower

The V20 diesel lighting tower features 4 x 320w LED floodlights, low consumption diesel engine and low sound pressure level. This model is towable and is ideally suited for roadworks, airports and construction applications.

- Control panel with digital controller and easy function selector
- 3 modes: manual, darkness sensor and timer
- Adjustable light power output from 25% to 100%
- 3 doors for a wider access
- Rapid locking stabilizers
- The V20 can be connected to another V20 so that two lighting towers can be driven by one engine.
